

Activated carbon filters Series MX

New

Ports G3/4 - G1

Modular

Bowl with technopolymer cover and bayonet-type mounting

- » Removal of compressed air oil, liquid, and gas components through the active carbons
- » Air quality conforming to ISO 8573-1 standard, up to class 1.7.1
- » Bowl locking mechanism reducing the risk of accidents

The Series MX has been realized to offer a multi-sector solution that guarantees saving in terms of installation time, space and costs. A special configurator, available on Camozzi website at <http://catalogue.camozzi.com> (sec. Configurators), allows the customer to choose the most suitable solution for his application, selecting single components or by configuring assembled FRLs.

MX3 is the new series of air treatment components realized by Camozzi, characterized by a modern, linear and compact design, offering high performances. The perfect integration between metal alloys and technopolymers has allowed the realization of a reliable product, light and strong at the same time. Thanks to a new concept of modularity, moreover, the mounting of components has become easier.
