12

**1 Profiles 5**

- Our most compact aluminium profiles
- Modular dimension of 20 mm
- Full functionality, low bulk
- For applications where space is limited

17

Section 1

**6 Profiles X**

- Minimised edge radii make this line ideal for building systems with closed surfaces
- Compatible with Line 8
- For constructions with a high-end look that are easy to clean

32

Section 1

**2 Profiles 6**

- Economical use of materials, generous performance
- High carrying capacity despite low dead weight
- For systems with a compact design

21

Section 1

**7 Profiles 10**

- Greater load-carrying capacity thanks to reinforced profile walls
- Exceptional reliability against pre-tension losses

45

Section 1

**3 Lightweight profiles**

- Additional cavities help reduce weight
- Profile core offers full load-carrying capacity
- Available in Lines 6, 8 and 12

21

Section 1

**8 Profiles E**

- Exceptionally light due to minimal use of materials
- Profile groove remains fully functional
- Available in Lines 8 and 10

27

Section 1

**4 Profiles 8**

- The standard material for design engineers
- Huge selection of accessories and enhancements
- Robust and strong despite small dimensions

27

Section 1

**9 Profiles 12**

- The strongest profile line in the MB Building Kit System
- Highest load-carrying capacity and maximum tensile loading
- Stable basis for extremely strong frames

47

Section 1

**5 Special materials**

- The alternatives to aluminium – stainless steel or 70 percent wood composite material
- For special applications
- Available as Profiles 8

## Profiles and accessories

### Products in this section

**Profiles 5 – modular dimension of 20 mm**

- Extremely compact dimensions
- For refined, stable and flexible applications

§17

**Profiles 5 – flat cross-sections**

- Particularly flat profiles
- Full functionality at a height of just 8.5 to 14 mm

§19

**Profiles 5 R**

- Closed on two sides, rounded surface
- Available in various angles

§20

**Profiles 6 – modular dimension of 30 mm**

- The weight-optimised profile line
- Ideal for slimline, robust design

§21

**Profiles 6 – flat cross-sections**

- Low installation height
- For fastening lightweight components

§24

**Profiles 6 R**

- Ideal for building protective hoods, frames and tables
- Closed on two sides, rounded surface
- Available in various angles

§26

**Profiles 8 – modular dimension of 40 mm**

- The universal and robust all-rounder
- Three variants for constructions with optimised load-carrying capacity

§27

**Profiles 8 – Line X**

- Exceptionally elegant
- Ideal for closed surfaces (cleanroom)

§32

**Profiles 8 – flat cross-sections**

- Reduced construction height with full groove
- Suitable for use as a frame, support or strut

§34

**Bed Plate Profile 8**

- For creating panels in any size
- As a cover or fastener

§36

**Profiles 8 – 45° Angle**

- Elegant connection options for up to three profiles
- Ideal for display cases, tables and systems with an elegant aesthetic appeal

§37

**Profiles 8 D**

- Large central bore
- Ideal for accommodating shafts, spindles and axles

§39

**Profiles 8 W**

- Angled profiles for mounting components
- For use as a panel fixing strip

§42

**Profiles 8 D40**

- Profiles with a cylindrical cross-section
- Covered grooves can be opened up

§43

**Profiles 10 – modular dimension of 50 mm**

- New line for high-strength constructions
- Particularly secure fastenings

§45

**Profiles 10 – flat cross-sections**

- Reduced construction height for space-saving frames and supports
- With full Line 10 groove

图46

**Profiles 12 – modular dimension of 60 mm**

- The strongest profile line in the MB system
- For particularly stable, heavy-duty constructions

图47

**Solid profiles and profile edging**

- Profiles without grooves for use as grip rails or edging
- For edging any panel elements

图50

**Caps**

- Suitable for all profiles
- Made from plastic or metal

图52

**Caps for bores**

- Dust-tight seal for profile bores
- Available in two colours

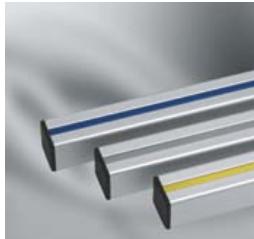

图63

**Cover Profiles AI**

- Creates a closed surface
- Covers cables running through the groove

图65

**Cover Profiles PP**

- One profile in various colours with two applications
- For covering the profile groove or fixing panel elements in place

#### Note:

Technical data on the profiles can be found in Section 19.

## Overview – finding the right profile fast

### Key features of the item profiles

#### 1 Modular dimension

Each line is based on square profiles with external dimensions of 20, 30, 40, 50 or 60 mm. Continuous grooves run along all four sides.

#### 4 Lightweight profiles

Additional cavities reduce weight but also lower maximum tensile loading. Lightweight profiles use profile grooves in the relevant modular dimension.

#### 2 Profile groove

The size and load-carrying capacity of the groove increases in line with the modular dimension. Most profile connections are anchored in the groove. The groove also serves as an anchor point for panel elements, etc.

#### 5 Closed grooves

Profile variants with closed surfaces offer more than just aesthetic advantages. They are also easy to clean and eliminate the problem of dirt accumulation in grooves.

#### 3 Core bore

The core bore offers a stable fastening point at the end faces of the profiles. It can also be used as a conduit for compressed air.

#### 6 Line X

Thanks to its smooth, closed outer surfaces, Line X has a particularly elegant appearance. It has the same dimensions as Line 8 and can be used to create dust and dirt-tight constructions.

### Side-by-side comparison of the profile lines

	1 Modular dimension	2 Max. tensile loading	5 Closed groove	6 Line X
Profiles 5 – the compact profile for precision work 				
Profiles 6 – the lightweight alternative 	20 mm	500 N	Yes	No
Profiles 8 – the standard material for design engineers 	30 mm	1,750 N	Yes	No
Profiles 10 – the added-value profile with increased load-carrying capacity 	40 mm	5,000 N	Yes	Yes
Profiles 12 – the robust option for load-carrying applications 	50 mm	7,000 N	No	No
	60 mm	10,000 N	No	No

## Profiles 5 – modular dimension of 20 mm

### The compact profile for precision work

- Extremely compact dimensions
- Available with open or closed grooves
- Low material usage safeguards resources
- For refined, stable and flexible applications

Closed grooves make systems easier to clean and create a more elegant appearance.

## Profiles 5 – flat cross-sections

- Particularly flat profiles
- Full functionality at a height of just 8.5 to 14 mm
- Suitable as support profiles or anchor points
- For lightweight clamping and mounting surfaces

**5**

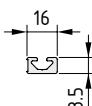

Flat profiles from item can be used to make handles of virtually any length.

High-precision linear slides use profiles with a flat cross-section as carriage profiles.

## Profiles 6 - modular dimension of 30 mm

### The lightweight alternative

- The weight-optimised profile line
- Ideal for slimline, robust design
- Available with open or closed grooves

Closed grooves are easy to clean and have a particularly elegant appearance. They create functional and attractive display cases, tables and cover hoods.

## Profiles 6 – 45° Angle

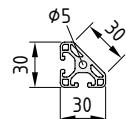

- Create stylish designs
- For hoods, tables and display cases

**6**

item supplies Fastening Set 6 30x30-45° specifically for use with these 45° profiles. It combines two or three profiles to form an attractive right-angled corner unit.

## Profiles 8 - modular dimension of 40 mm

### The standard material for design engineers

- The universal and robust all-rounder
- Three variants for constructions with optimised load-carrying capacity
- Available with open or closed grooves
- Products from Line X also available

The MB Building Kit System from item is a tried-and-tested basis for machines and systems of all sizes. Profiles 8 are the most frequently used profiles of all the lines worldwide. Thanks to their design, these aluminium profiles are light, robust and versatile with a service life of many years. Due to the wide selection of modules available, Profiles 8 can satisfy virtually all your construction needs.

Profiles with closed grooves are particularly easy to clean and can be combined with conventional profiles as required.

Some cross-sections incorporate closed grooves that can be easily opened.

The profiles in Line X can be built into elegant constructions with closed surfaces. The minimised edge radius results in a seamless connection between profiles and eliminates protruding edges. As a result, dirt and deposits have no chance of ruining the striking aesthetic appeal of Line X.

The profiles in Line X use Line 8 grooves, ensuring they are compatible with all the accessories in that line.

## Profiles 8 – Flat Cross-Sections

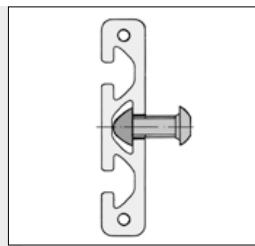

- Full groove despite low construction height
- For attaching elements
- Suitable for use as a frame, support or strut

Profile 8 40x16 E can be used in conjunction with Hand Grip Element 8 to construct grip rails and handles.

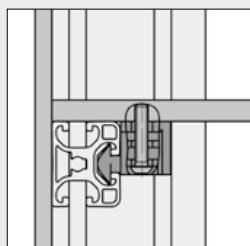

Profiles 8 80x16 and 160x28 are suitable for building the sliding carriages of roller guides 8 D6 and D14.

When using the centre groove of Profile 8 80x16, an access hole must be provided at the envisaged fastening position.

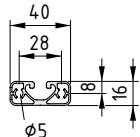

Profile 8 160x28 can also be used as a clamping and mounting surface or edgewise as a heavy-duty supporting profile.

Profiles 8 40x32 and 80x32 light are particularly suitable for use as frames and struts in table, shelving and cabinet constructions. They are then used to connect profiles of modular dimension 40 mm.

## Profiles 8 – 45° Angle

- Connect up to three profiles
- For sophisticated tables, display cases and systems

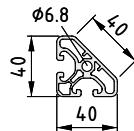

The 45° profiles bring a sophisticated aesthetic appeal to a whole range of constructions. Fastening Set 8 40x40-45° creates particularly elegant corner units.

- Angled profiles with grooves
- For use as panel fixing strips
- For supporting shelves

The inside corner of the angled profiles is provided with an undercut. Attachments with sharp edges can therefore be screwed flush with the surface on both sides.

## Profiles 8 D40

### Edge-free elegance

- Profiles with a cylindrical cross-section
- Can be combined with square profiles
- Available with open or closed grooves
- Closed grooves can be subsequently opened up

The cylindrical cross-section, which is 40 mm in diameter, is the main feature of Profiles 8 D40. Their four Line 8 grooves are arranged at 90° angles to each other and can be either open or closed, as required. Cylindrical profiles are ideal for use in hand rails, tables, shelves and ancillary factory equipment such as signage.

Cylindrical and angular profiles from the MB Building Kit System can be combined to suit the task at hand. This compatibility is made possible by Adapter 8 D40. The connections meet the same standards in stability and reliability that design engineers have come to expect from all item products.

## Profile 10 50x20 E

- Lightweight thanks to flat cross-section
- Full Profile 10 groove on one side, closed surface on the other
- Ideal for stable, space-saving struts and frames

Thanks to its flat cross-section, Profile 10 50x20 E takes up little space when integrated into constructions. The Line 10 groove leaves open all the fastening options associated with Profiles 10, providing a secure hold for all fastening elements. The closed surface on the rear of the profile is easy to clean. This profile makes it easy to add flat struts to a construction or build stable lightweight frames.

## Profiles 12 – modular dimension of 60 mm

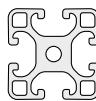

### The robust option for load-carrying applications

- The strongest profile line in the MB system
- Exceptional reliability against pre-tension losses
- Tensile loading up to 10,000 N per screw connection
- For particularly stable, heavy-duty frame structures

## Caps for Profiles in modular dimensions

- Robust Caps made from glass-fibre-reinforced plastic
- Vibration-proof and temperature-resistant
- Protection against sharp cut edges
- Numerous designs also available in grey
- Products from Line X also available

## Caps for bores

### Safe and clean

- Seal profile bores to stop dust getting inside
- Available in two colours

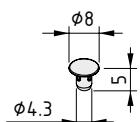

Grey Caps can be used to seal the holes in the sides of profiles with closed grooves. The grey blends in well with the aluminium.

Cap 8 D7-D40 can be used to seal the 7 mm dia. through hole for the Standard Fastener 8 tool in Profiles 8 D40 with closed grooves. The grey colour is matched to the surface of the natural anodized profiles.

Cap 8 D15 covers Countersink 8 DIN 974 T1 - Row 1 (e.g. connection of Clamp Profiles 8).

Cover Profiles Al

- Dust-tight and easy to clean
  - For covering cables running through the groove

Cover Profiles can also be printed or engraved for labelling modules.

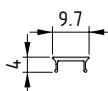

Whenever it is especially important that constructions are kept clean and look good, Cover Profiles A1 neatly close over the groove, either in sections or along the entire length of the profile.

## Cover Profiles R, WR and F

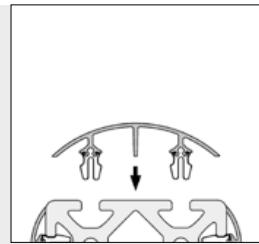

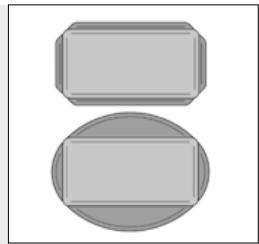

- Stylish cover for profile sides
- Rounded and flat versions available
- For constructions with a high-end look

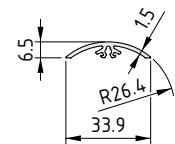

Cover Profile WR creates a uniformly wavy pattern around the main profile, neatly integrating the four corners.

Cover Caps R and F integrate the cap of the basic profile.

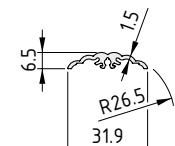

The round and flat Cover Profiles R, W and F are inserted into the grooves of Profiles 8 in conjunction with Clip 8 St.
